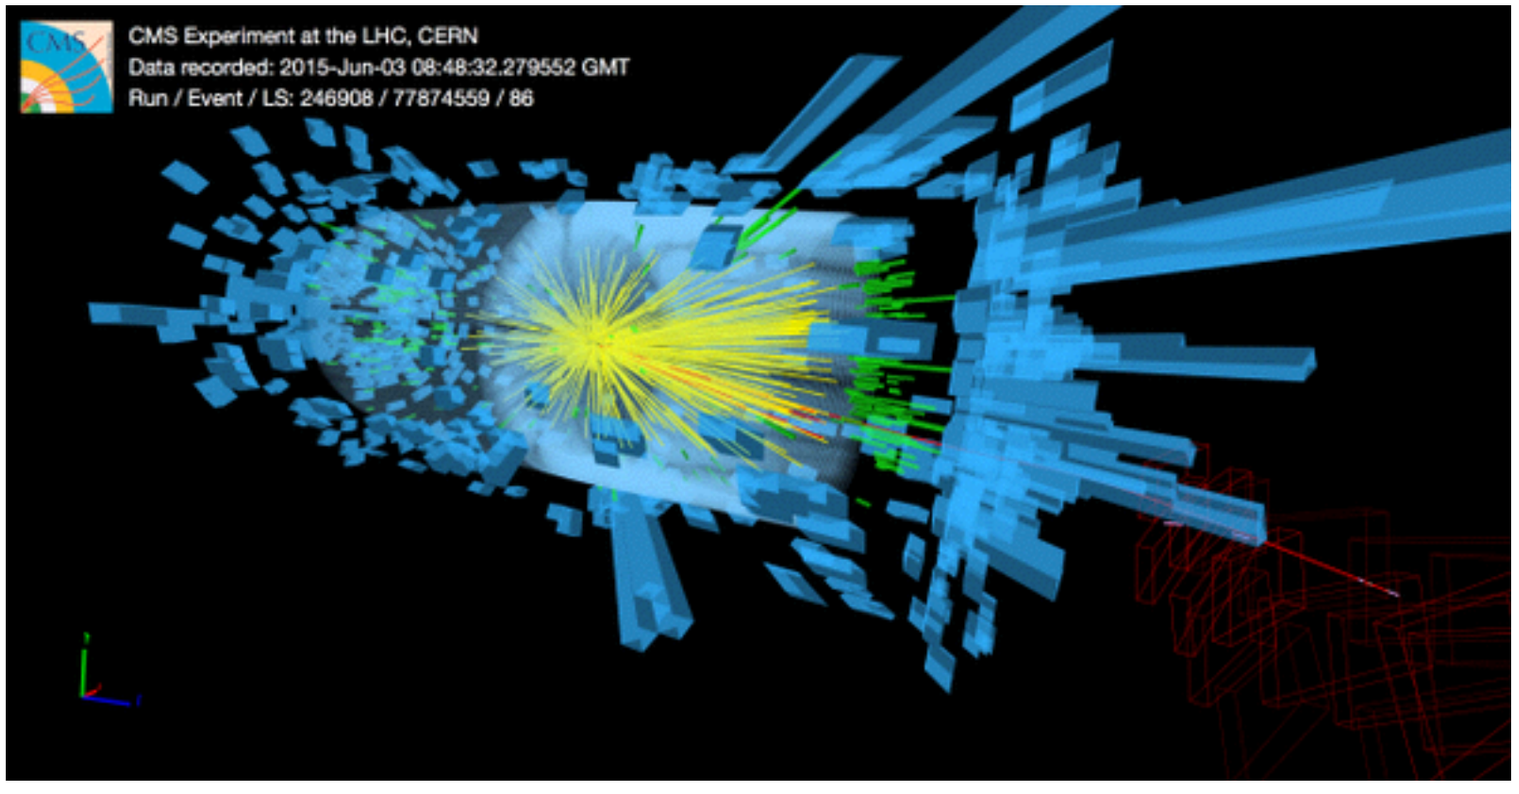
BSM WG

Conveners: C.Delaunay, A. Delgado(TH) G. Brooijmans (Exp)

Collisions at 13 TeV!!!!!



Big Questions

- Although the Run-I of the LHC has been a huge success with the Higgs discovery….
- There are still several questions that ‘we hope’ the Run-II of LHC will be able to address……
- Data are being taken right now so keep your fingers crossed.

- We still have to know if the Higgs is just the SM higgs or its nature is different

- We still have to know if the Higgs is just the SM higgs or its nature is different

Higgs WG
(Collaboration across
WG is encouraged)

- We still have to know if the Higgs is just the SM higgs or its nature is different

Higgs WG
(Collaboration across
WG is encouraged)

- We still have to know if the Higgs is just the SM higgs or its nature is different

- Related to the previous point (or maybe a different way of saying it), how is EW breaking realized?

NB: I am going to through ideas on the board

NB: I am going to through ideas on the board

- The nature of the EWSB could be:

NB: I am going to through ideas on the board

- The nature of the EWSB could be:
  - weakly coupled: SUSY, little Higgs, fine-tuned as in the SM

NB: I am going to through ideas on the board

- The nature of the EWSB could be:
  - weakly coupled: SUSY, little Higgs, fine-tuned as in the SM
  - strongly coupled: Composite Higgs

*Only a selection of the available mass limits on new states or phenomena is shown. All limits quoted are observed minus 1σ theoretical signal cross section uncertainty.

Goals for Les Houches

- Form small groups to work on a particular topic relevant for the LHC

- Take advantage of having a good collection of theorists and experimentalist in a wonderful location

- Produce a document!!!!!!

Possible list of topics
